

Paul Kim

Undergraduate at Electrical & Computer Engineering, Seoul National University

[in @thekpaul](#) <https://thekpaul.dev> [🇰🇷 Republic of Korea](#)

[📧 thekpaul](#) jsvn7777@snu.ac.kr thekpaul000@gmail.com

Education

From Mar. 2018 BA in Electrical & Computer Engineering, Seoul National University
Expected to graduate in Summer 2024
Areas of Interest: System Programming, Digital Systems Design, Deep Learning
Graduation Project: Optimising the CNN Architecture with Hardware Design

Experience

From Mar. 2023 FPGA Engineer Intern for **NeuroRealityVision**
Dongtan, Republic of Korea

- Firmware, software development for MIPI-to-Ethernet integration
- Bare-metal, standalone FPGA application with interrupt-based workflow
- Custom IP development with Verilog-based RTL on Vivado

Jan. 2023 to Jun. 2023 Student Intern for Dept. of System Semiconductor Engineering
Seoul National University, Seoul, Republic of Korea

- Worked on CNN Architecture and Hardware Design Optimisation

Dec. 2019 to Jul. 2021 KATUSA, Human Resources Specialist (42A)
94th Military Police Battalion, Pyeongtaek, Republic of Korea

- Mandatory military service as a KATUSA Agent
(Korean Augmentation To the United States Army)

Skills

- Engineering**
- Experienced in embedded systems design on multi-purpose SoC FPGAs
 - Capable of basic RTL hardware design using Verilog
 - Capable of versatile development with C, C++ and Python
 - Capable of maintaining HTML/CSS front-end projects
 - Proficient in typesetting with \LaTeX
- Languages**
- Korean: Native proficiency
 - English: Fluent, professional working proficiency

Education

Bachelor's Degree: ECE, SNU

- Expected to graduate in Summer 2024
- **Graduation Project:** Optimising the CNN Architecture with Hardware Design
 - RTL development with Verilog
 - Pipelined, streaming CNN architecture concurrently running multiple convolution layers
 - Improved performance in faster speed and less memory usage without affecting end results
- **Areas of Interest:** System Programming, Digital Systems Design, Deep Learning

Key Courses Taken:

- Computer Organisation, Digital Systems Design: Basic RTL simulation and synthesis on FPGAs
- Operating Systems: System calls, tasks, multithreading and scheduling on the Linux kernel
- Other Computer-related Courses: Introduction to Data Structures, Introduction to Algorithms

Experience

FPGA Engineer Intern: NeuroRealityVision

- Firmware, software development for MIPI-to-Ethernet integration
 - Extract MIPI data from normal camera (CIS) and **event camera** (DVS) sensors to FPGA main memory
 - **PS** (Processing System): Xilinx Gigabit Ethernet Controller (GEM) via embedded ARM Cortex A53 CPU
 - **PL** (Programmable Logic): Xilinx AXI 1 G Ethernet Subsystem with multiple AXI DMA blocks
 - Experienced in hardware-firmware communication and interrupt handling mechanisms
 - Experienced in server-side software development for communication with attached FPGA boards
ex. Ethernet packet parsing software to receive MIPI data and reconstruct image stream
- Custom IP development with Verilog-based RTL on Vivado
 - Receive parallel data from attached event camera (DVS) sensor and reorganise for AXI4-Stream
 - Created block designs including RTL blocks to generate IP
 - Basic experience with generating functioning IPs based on block designs in Vivado

Student Intern: SSAI, SNU

- Research Interest: CNN Architecture and Hardware Design Optimisation
- In tandem with **graduation project** for bachelor's degree from ECE, SNU

KATUSA Human Resources Specialist

- Mandatory military service as a KATUSA Agent (Korean Augmentation To the United States Army)
- Human Resources Specialist (42A) for RSO HHD, 94th Military Police Battalion at Camp Humphreys
